Welcome to the Eliora Topical Concordance to the Bible with Contextual Referencing.

On this site you can choose between our three editions. Versions 1 and 2 offer our PDF based Concordance files. Version 3 is HTML based and also includes additional Bible Study material.

Scroll down with your mouse and you will see the Download Options segment as seen above [↑](#).

If you click on the word ZIP which is indicated by the Blue pointer, the ZIP FILES panel (shown here on the right) will appear allowing you to select which Version you wish to download.

When it has downloaded to your device, you can simply click on the .zip file and your system will unpack the files.

ZIP FILES	
↑ BACK	3 files
Version1.zip	1.0M
Version2.zip	894.5K
Version3.zip	3.8M

View Versions 1 & 2 with a PDF viewer or print them to paper.
Open Version 3 with your Webpage Browser.

Accessibility is enabled in our PDF files so you can highlight any section and have your device process the section with your chosen AI voice.

All Versions of our Concordance include a FREE Share License, so you can pass on the .ZIP files to your family and friends without any concerns of breaking Copyright.

Regards
Larry and Eliora

Common Q & A

- Q - Why are there three versions of the Eliora Topical Concordance to the Bible with Contextual Referencing?
- A - The reason for having three versions is so that you can have more flexibility when you are working with our Files.
- Q - What is the purpose for Version 1?
- A - Version 1 has ten individual files so that you can be working with different sections of the Concordance at the same time without needing to keep moving away from your initial position in the Alphabetical ordered list of Keywords.
- Q - What is the purpose for Version 2?
- A - Version 2 has only two files. File 1 contains the Index and Introduction. File 2 contains the main body of data. Version 2 was initially designed to allow for the printing of a paper copy of the Concordance. A second benefit of having all the data in one file is that you can easily perform “word searches” of the whole concordance allowing for more diverse Bible Studies.
- Q - Can I search for Scripture references within the PDF Concordance files?
- A - You can perform Scripture reference searches but there are limitations. This is a work in progress and is NOT exhaustive, so many scriptures have yet to be included.
- Q - How often do you release a new publication of the Eliora Topical Concordance to the Bible with Contextual Referencing?
- A - There is no fixed frequency for new releases of our Concordance but we try to complete a new release annually. There are three integers in our Version code eg. Version 1.4.6 . The first is the actual Version number. The second integer signifies how many times we have changed the format used for the entries in the version. The third integer indicates how many times we have made a release of the Version. The value 6 at the end of our current releases means we have updated our Concordance six times since our first publication in 2018.
- Q - How do I perform Scripture reference searches within the PDF Concordance files?
- A - Scripture references are NOT in “Bible Book” order. The alphabetical order is based on the Topic and Keyword entries. The most successful way to find a Scripture reference is to search for the Book and Chapter number only – eg. “Matthew 5”
Your PDF reader will locate every instance of “Matthew 5” allowing you to scroll through the file until you locate the passage you are seeking providing it has been included.
Your Scripture may be mentioned under multiple Keywords, so do not stop looking when you have found the first entry.
- Q - Can I perform “word searches” within the Version 3 files?
- A - Version 3 does allow “word searches” but the method will be controlled by your Webpage Browser.
Place your mouse on the page you wish to search and press the Right mouse button. From the pop up menu, choose to open “this Frame” in a “New Tab”.
Move to the New tab and then use the Browsers option to “Find in Page”. This option is often available under the  symbol at the top right of the Browser window.
